

NUTRITION MYTHS

MYTH: You have to consume milk or dairy to meet calcium needs.

FACT: Plants are the original source of calcium absorbing minerals from the soil.

Calcium and other minerals are found in the soil and are absorbed into the roots of plants. The calcium in cow's milk originates in those calcium-rich plants the cow eats.

Daily calcium requirement: 1,000 mg for adults and children ages 4 and older.

MYTH: Carbohydrates are bad for you.

FACT: Not all carbs are created equal. Carbohydrates from vegetables, fruits, whole grains, beans, and legumes provide energy, essential nutrients, and are health-promoting carbohydrate choices.

Nutrient Dense = More Nutrition for Less Calories

	150	CALORIES	350		Plain Bagel
Steel Cut Oats	5 g	PROTEIN	14 g		
	33 g	CARBOHYDRATES	70 g		
	1 g	FAT	2 g		
	4 g	FIBER	2 g		

There are many different types of carbohydrates. Your focus should be on choosing the right type of carbs, not getting rid of carbs altogether. Whole plants and unrefined whole grains are excellent carbohydrate choices that provide fiber, protein, vitamins, minerals, phytonutrients, and healthy fats. Carbohydrates are the body's preferred source of energy and the brain's only source of energy.

MYTH: Most people do not get enough protein.

FACT: The average person consumes too much protein.

How much protein do you need per day?

19-51+ years old*

The average adult person consumes 80 grams of protein per day – far more than is necessary! Excess protein is stored as fat and can lead to weight gain or prevent weight loss. Our bodies benefit from consuming mostly fruits, vegetables, whole grains, beans, and legumes to provide healthy sources and amounts of carbohydrate, fat, and protein.

*The general recommendation for protein intake is 0.8g/kilogram or 0.36g/pound.

MYTH: You need to eat animal protein to meet your protein needs.

FACT: Plants foods such as beans, lentils, nuts, whole grains, and veggies provide ample protein, as well as fiber and other essential vitamins, minerals, and phytochemicals not found in animal products such as meat, fish, poultry, eggs, and dairy.

PLANT PROTEIN	18g	17g	15g	6g	5g	5g
per serving	Red Lentils boiled, 1 cup	Edamame boiled, 1 cup	Black Beans cooked, 1 cup	Almonds 1 oz	Peas cooked, 1 cup	Baked Potato 1 medium
ADVANTAGES						
	• Fiber					
	• Phytonutrients					
	• Vitamins & minerals					
	• Low or healthy fat profile					
	• No cholesterol					
						Spinach boiled, 1 cup 

ANIMAL PROTEIN

per serving	6g	20g	25g	25g
DISADVANTAGES	Egg cooked, 1	Salmon cooked, 3 oz	Steak cooked, 3 oz	Chicken cooked, 3 oz
				
	• Cholesterol			
	• Saturated fat			
	• No fiber			
	• Higher in calories			

Eating minimally processed whole plant foods such as vegetables, fruits, whole-grains, legumes, and nuts lower the risk of diabetes, heart disease, cancer, and promote overall health.
